## About Us

Bahrain Livestock Company (BLC) is the major company in the Kingdom to import livestock, chilled/frozen red meat, poultry, frozen vegetables, dry and dairy products from around the world, and is the largest distributor of high-quality halal-certified meat in the country. Our customers' requirements are always the highest priority for BLC , so we can guarantee that they are eating the freshest and healthiest food available.

We have maintained our excellent reputation of unparalleled service since BLC's inception in 2000 and have proven our capability to meet the demands of the Bahrain market, even throughout the peak consumption periods of Ramadan and the Eid holidays, with a consistent high-quality supply of chilled and live meat.

Although imported meats are considered a rare luxury in many parts of the world, BLC makes this affordable and accessible to all residents of Bahrain.

Beef Chilled (Shoulder/Leg)

- Pakistan Beef
- Sudanese Beef

## Our History

BLC was established in the year 2000 by an Amiri Degree as a closed shareholding company after taking over from the Bahrain Government, the meat and livestock trading operation, assets including the main country's slaughter house and feedlot in Sitra.

BLC was initially given a monopoly to import and distribute subsidized live Australian animal meat at controlled selling prices for the first five years from its inception. This ended in 2005 but BLC continued to provide consumers in Bahrain with all types of fresh meat from locally slaughtered animals at subsidized prices and subsequently this was extended to also include chilled meat imported daily by air from different countries. Since the subsidy was lifted in 2015, BLC is fully commercialized company.

The company used to operate an adjacent feedlot with an area of over 91,300 square meters that can accommodate up to 55,000 head of livestock under shelter with full high standard feeding facilities. BLC's multi-award-winning feedlot is classed as one of the finest facilities within the Middle East.

Available (frozen) cuts:

Chuck Roll

Chuck Clod

Knuckle

Topside

Flap

Flank

## Our Quality Standards

### Halal Assurance

Since its inception, BLC has carried out many initiatives to improve and upgrade the facilities to comply with Bahrain Government's regulatory requirements. This is continuing on an ongoing basis and we are very proud to be one of the ESCAS approved entities certified by Australian Government Regulators. Over several years of operation, the company has received several recognitions and awards from Meat and Livestock Australia (MLA).

Our team of trained and highly experienced employees is in charge of all activities of the company including feeding and care of live animals and maintaining the feedlot in accordance with internationally recognized animal welfare regulations. At the slaughterhouse facility, we operate under strict hygiene regulations supervised by BLC's own employed veterinarian and subject to official monitoring and controls by the Bahrain Government. All slaughtering at the abattoir is performed with strict adherence to Islamic Sharia laws and in accordance with internationally recognized standards.

All livestock and meat imported into Bahrain and distributed by BLC are halal certified. BLC works with the Halal accreditation organizations of the countries where meat and livestock are imported from, to ensure that all the Sharia' principles related to Halal standards are implemented at all points of supply chain, processing and delivery.

### ESCAS (Exporter Supply Chain Assurance System)

In 2011 the Australian Government introduced a regulatory framework for the live export trade that covers the entire supply chain in overseas market places from the point of disembarkation to the point of slaughter. The Exporter Supply Chain Assurance System (ESCAS) places responsibility on Australian exporters to maintain control and ensure measurable animal welfare outcomes in-market. The livestock export industry has developed a portfolio of research to assist the industry implement ESCAS and the recommendations of the Independent Review of Australia's Livestock Export Trade, also known as the Farmer Review.

**"VOTED THE  
BEST STEAK IN  
THE WORLD..."**

## **Facilities**

### **BLC Feedlot**

The company also operates an adjacent feedlot to facilitate live animals from different origin under shelter with full high standard feeding facilities. BLC's multi-award-winning feedlot is classed as one of the finest facilities within the Middle East.

### **BLC Abattoir**

Located in Sitra operating to the highest global standards, BLC's abattoir can process over 2000 sheep per day. Fully halal, all procedures are Sharia compliant and carried out by Muslim slaughter men. With best in class facilities, BLC's abattoir is regarded as one of the finest in the region.

### **BLC Meat Processing Facility**

The Processing Plant is well equipped to process good quality and biosafe meat products to satisfy our diversified customer base. BLC can provide all different meat cuts with packaging as per customer requirement. BLC had implemented excellent Quality Assurance program in place to ensure the safe and hygiene production of meat.

### **BLC Fleet**

BLC owns and operates Ministry approved modern fleet of fully equipped temperature-controlled vehicles. The company's fleet of refrigerated trucks is specifically designed for transportation of meat carcasses in hanging position and has been independently audited. The fleet also includes liveried delivery trucks providing end-to-end supply chain capability to deliver food products to HORECA sector.

### **BLC Storage**

The BLC also owns and operates fully equipped temperature controlled cold storage facilities.
